DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13,26, drawn to a duplex image reading apparatus wherein the reading portion and color reference portion are movable perpendicular to an image reading surface, classified in class 358, subclass 496.
 - II. Claims 14-15, drawn to an image reading apparatus that eliminates static electricity accumulated on a sheet, classified in class 358, subclass 474.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II focuses on charge eliminating means within an image reading apparatus. The subcombination has separate utility such as first and second reading means arranged so that one of the reading portion or the color reference portion is supported so as to be moveable in a direction substantially perpendicular to an image reading surface of the reading portion.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
